

To install on Windows 8:

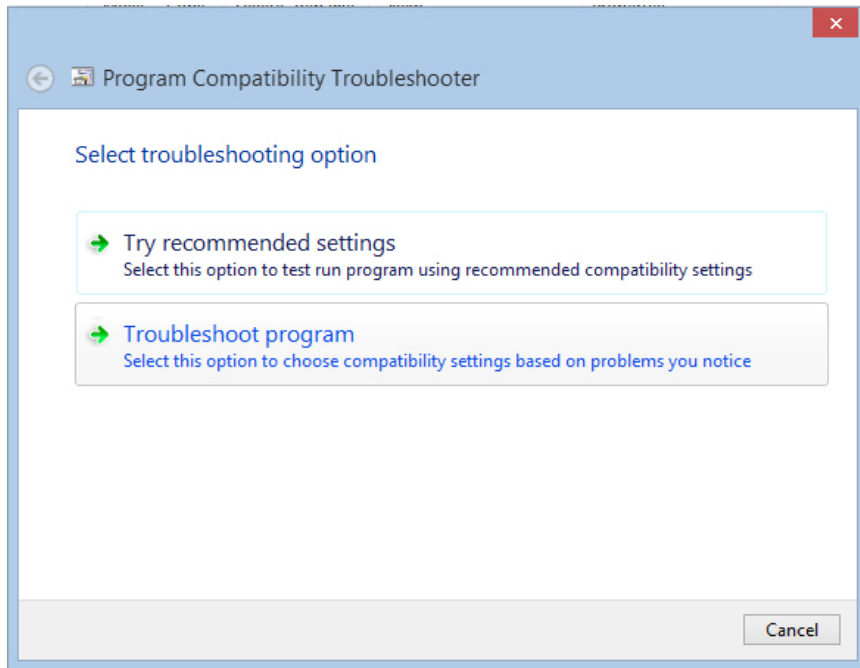

Find the file you just downloaded in your “downloads” folder.

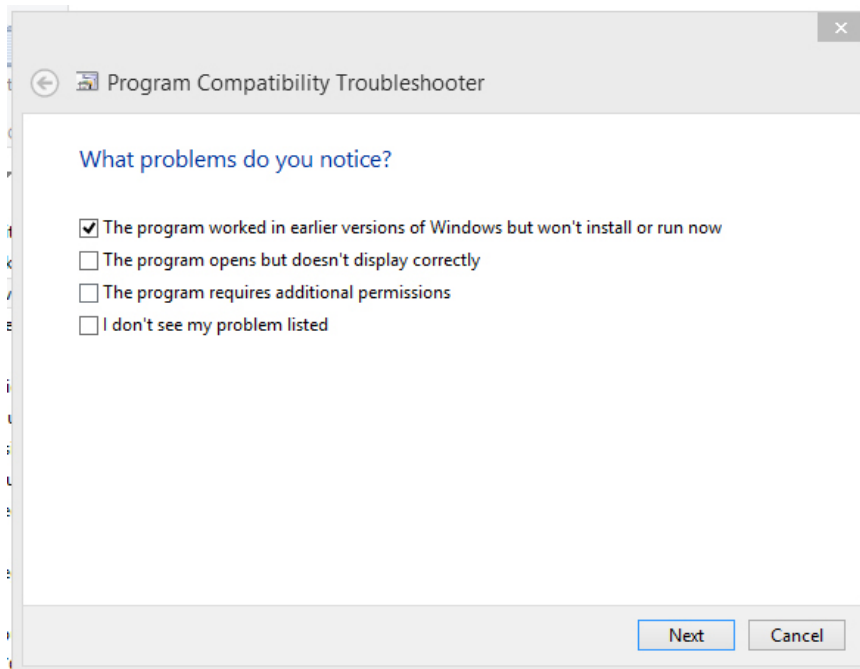

Right click the installer and choose: *Troubleshoot compatibility*

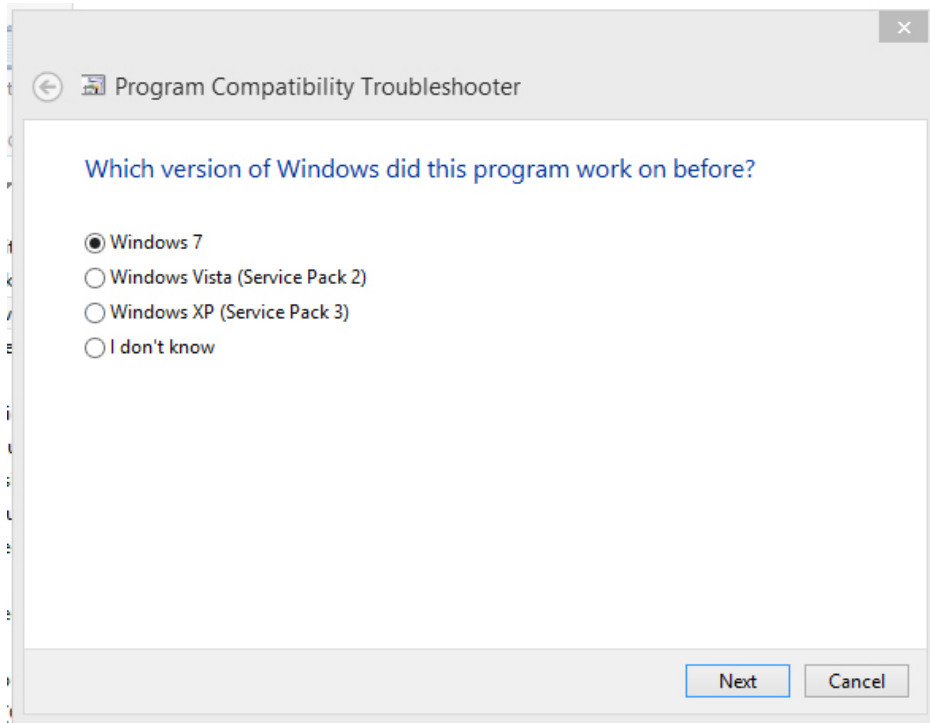

Choose: *Troubleshoot program*

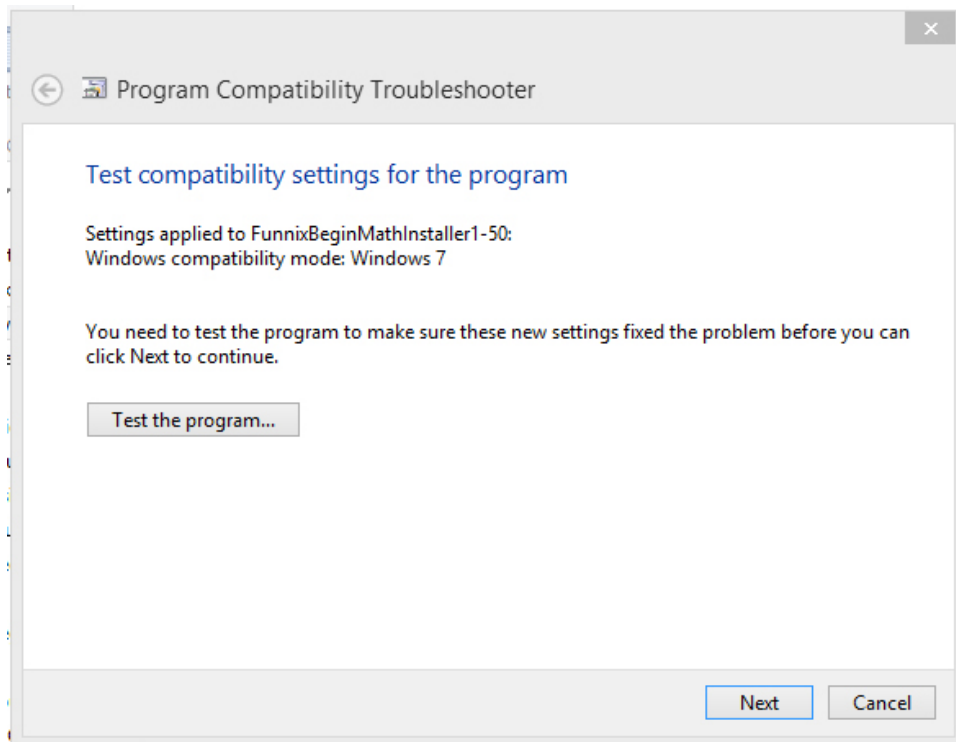

Choose: *The program worked in earlier versions of Windows but won't install or run now.*

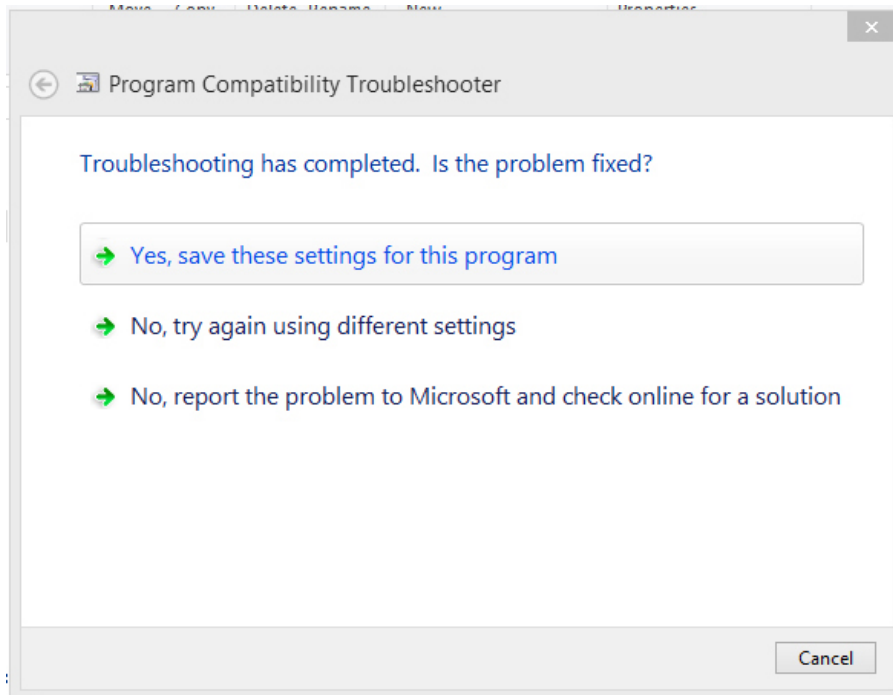

Choose: *Windows 7*, then click *Next*

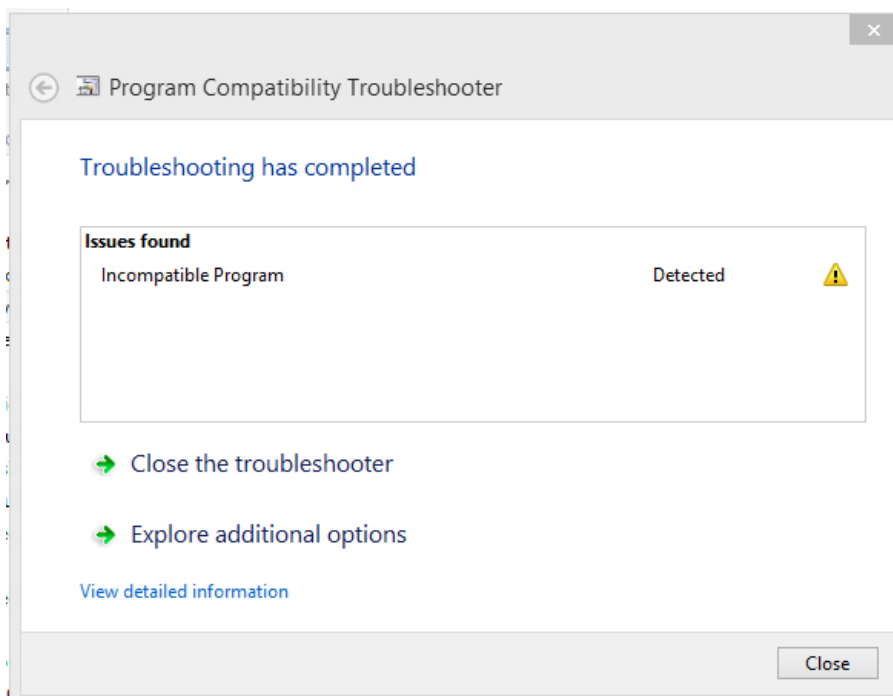

Choose: *Test the Program*, then click *Next*.

Choose: *Yes, save these settings for this program.*

Choose: *Close the troubleshooter*

Once you have closed the troubleshooter click this icon located along the bottom of your toolbar.

Click Yes to continue the installation and follow installation instructions.
